Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) Services

EPSDT covered services include services that correct or ameliorate physical and mental defects, conditions, and illnesses discovered by the screening process when those services fall within one of the 28 optional and mandatory categories of "Medical Assistance" as defined in the Medicaid Act (Federal Law Subsection 42 USC 1396d (a)).

Services covered under EPSDT include all 28 categories of services in the Federal Law even when they are not listed as covered services in the AHCCCS State Plan, AHCCCS statutes, rules, or policies as long as the services are medically necessary and cost effective.
