

Outcome Measures

Information that allows measurement of behavioral health outcomes for Adults and Children.

At a minimum, outcome measures for adults and children include the following:

- For all clients, a complete Demographic Data Set must be completed and submitted at the start of the episode of care, upon any major change in status, at least once every 365 days, and at the end of the episode of care.
- For children, the CASII field must also be submitted at least every 6 months.
